Incorrect Examples

- Ongoing activities by the research group show that the concept can be applied elsewhere.[\[2\]](#)

Correct Examples:

- Summarize research finding by the PI without a citation such as "The PI and co-PI have studied safety analysis and design tools for core seismic loads, specializing in detailed multi-physics of fluid-structure interactions (FSI) for over ten years and have published several papers in the area."
- Make general statements about the research and the associated citation as to avoid identification of a PI, collaborator, or teaming institution such as "CSS surface engineering by low-temperature carburization and nitridation have been subject to intense research for more than a decade.[\[3\]](#)[\[4\]](#)"
